SunGuard® Neutral 78/65

MORE NATURAL LIGHT AND SOLAR HEAT GAIN FOR HEATING-DOMINATED CLIMATES.

Designed to utilize the sun as a sustainable energy source, Guardian offers an advanced architectural glass for cooler climate zones where passive heat gain is desired. SunGuard Neutral 78/65 combines unique performance characteristics, including high visible light transmission and a high solar heat gain coefficient with a sought-after neutral color appearance.

Neutral 78/65 at a glance
- High visible light transmission: 78%
- Neutral reflected and transmitted color.
- High passive solar heat gain for heating-dominated climates: 0.66
- Designed to help meet energy codes in cooler climate zones.
- Ideal for both dual and triple glazed configurations.
- Can be used in conjunction with other SunGuard low-E coatings for maximum energy efficiency.

SunGuard products are distributed through Guardian's independent network of Select Fabricators. To locate a Select Fabricator, visit www.GuardianGlass.com.

* The performance values shown are nominal and subject to variations due to manufacturing tolerances.
* Guardian performance data are calculated for center-of-glass only (no spacer or framing) in accordance with the LBNL Window 7 program.
* A slight shift in visible light reflectance or transmission may be noticed after heat-treatment.
* Relative Heat Gain, Solar Heat Gain Coefficient and/or LSG may change slightly when using argon gas fill.
* Guardian reserves the right to change product performance characteristics without notice or obligation.
