Now you can expect a truer, more beautiful translucence from SatinDeco acid-etched glass. On ExtraClear substrate, the improved SatinDeco offers:

- Higher light transmission
- More uniform light diffusion
- Superior color neutrality

Its silky smooth surface resists smudges and fingerprints, and it’s easy to maintain using standard, nonabrasive products.

*The performance measurement for translucent or diffuse materials such as acid etched glass surface is limited by the currently available technologies. Since measurements capture only a part of the resulting radiation, calculated performance results provided herein and based on such measurements are not compliant with any standard and should only be used as a general reference.
On ExtraClear substrate, SatinDeco acid-etched glass is noticeably more color neutral. In addition to the ExtraClear option, SatinDeco is available on Guardian UltraClear® low-iron substrate for even greater clarity and color neutrality.

**RANGE OF APPLICATIONS**

Architects and designers use SatinDeco with ExtraClear to make visually striking and memorable doors and moveable walls, partitions and panel systems, tabletops, stairways, shower enclosures, windows and more. It brings depth and sophistication to a range of exterior and interior settings, including kitchens, bathrooms and bedrooms. It provides privacy with light in a variety of commercial applications, including offices, retail settings, hospitality and healthcare environments. Use it on its own as a monolithic glass or it can be fabricated into an insulated glass unit that includes performance glazing for added thermal insulation or solar control.

**FLEXIBLE OPTIONS**

SatinDeco on ExtraClear can be:
- cut to size
- heat treated
- bent
- screen printed
- laminated
- drilled
- notched
- polished

**AVAILABLE SIZES**

SatinDeco is available in size 96" x 130", and in thicknesses from 3mm to 15mm.
